# End-to-End ?

# User Experience

# Legacy Software

# Varianten in Software

- Groovy DSL on top of Selenium/WebDriver
- IDE support: syntax & debugging
- PageObject, Modules

```
import geb.Browser

Browser.drive {
  go "http://myapp.com/login"

  assert $( "h1" ).text() == "Please Login"

  $( "form.login" ).with {
    username = "admin"
    password = "password"
    login().click()
  }

  assert $( "h1" ).text() == "Admin Section"
}
```

waitFor { }

# waitFor { }

```
package demo
```

```
import geb.Browser
```

```
Browser.drive {
```

```
  go "https://mynethome.de/animation.html"
```

```
  assert title == "Animation For Waitfor Example"
```

```
  $("div#app button").click()
```

```
  waitFor { !$("div.modal").hasClass("fade-enter-active") }
```

```
  $("div.modal button").click()
```

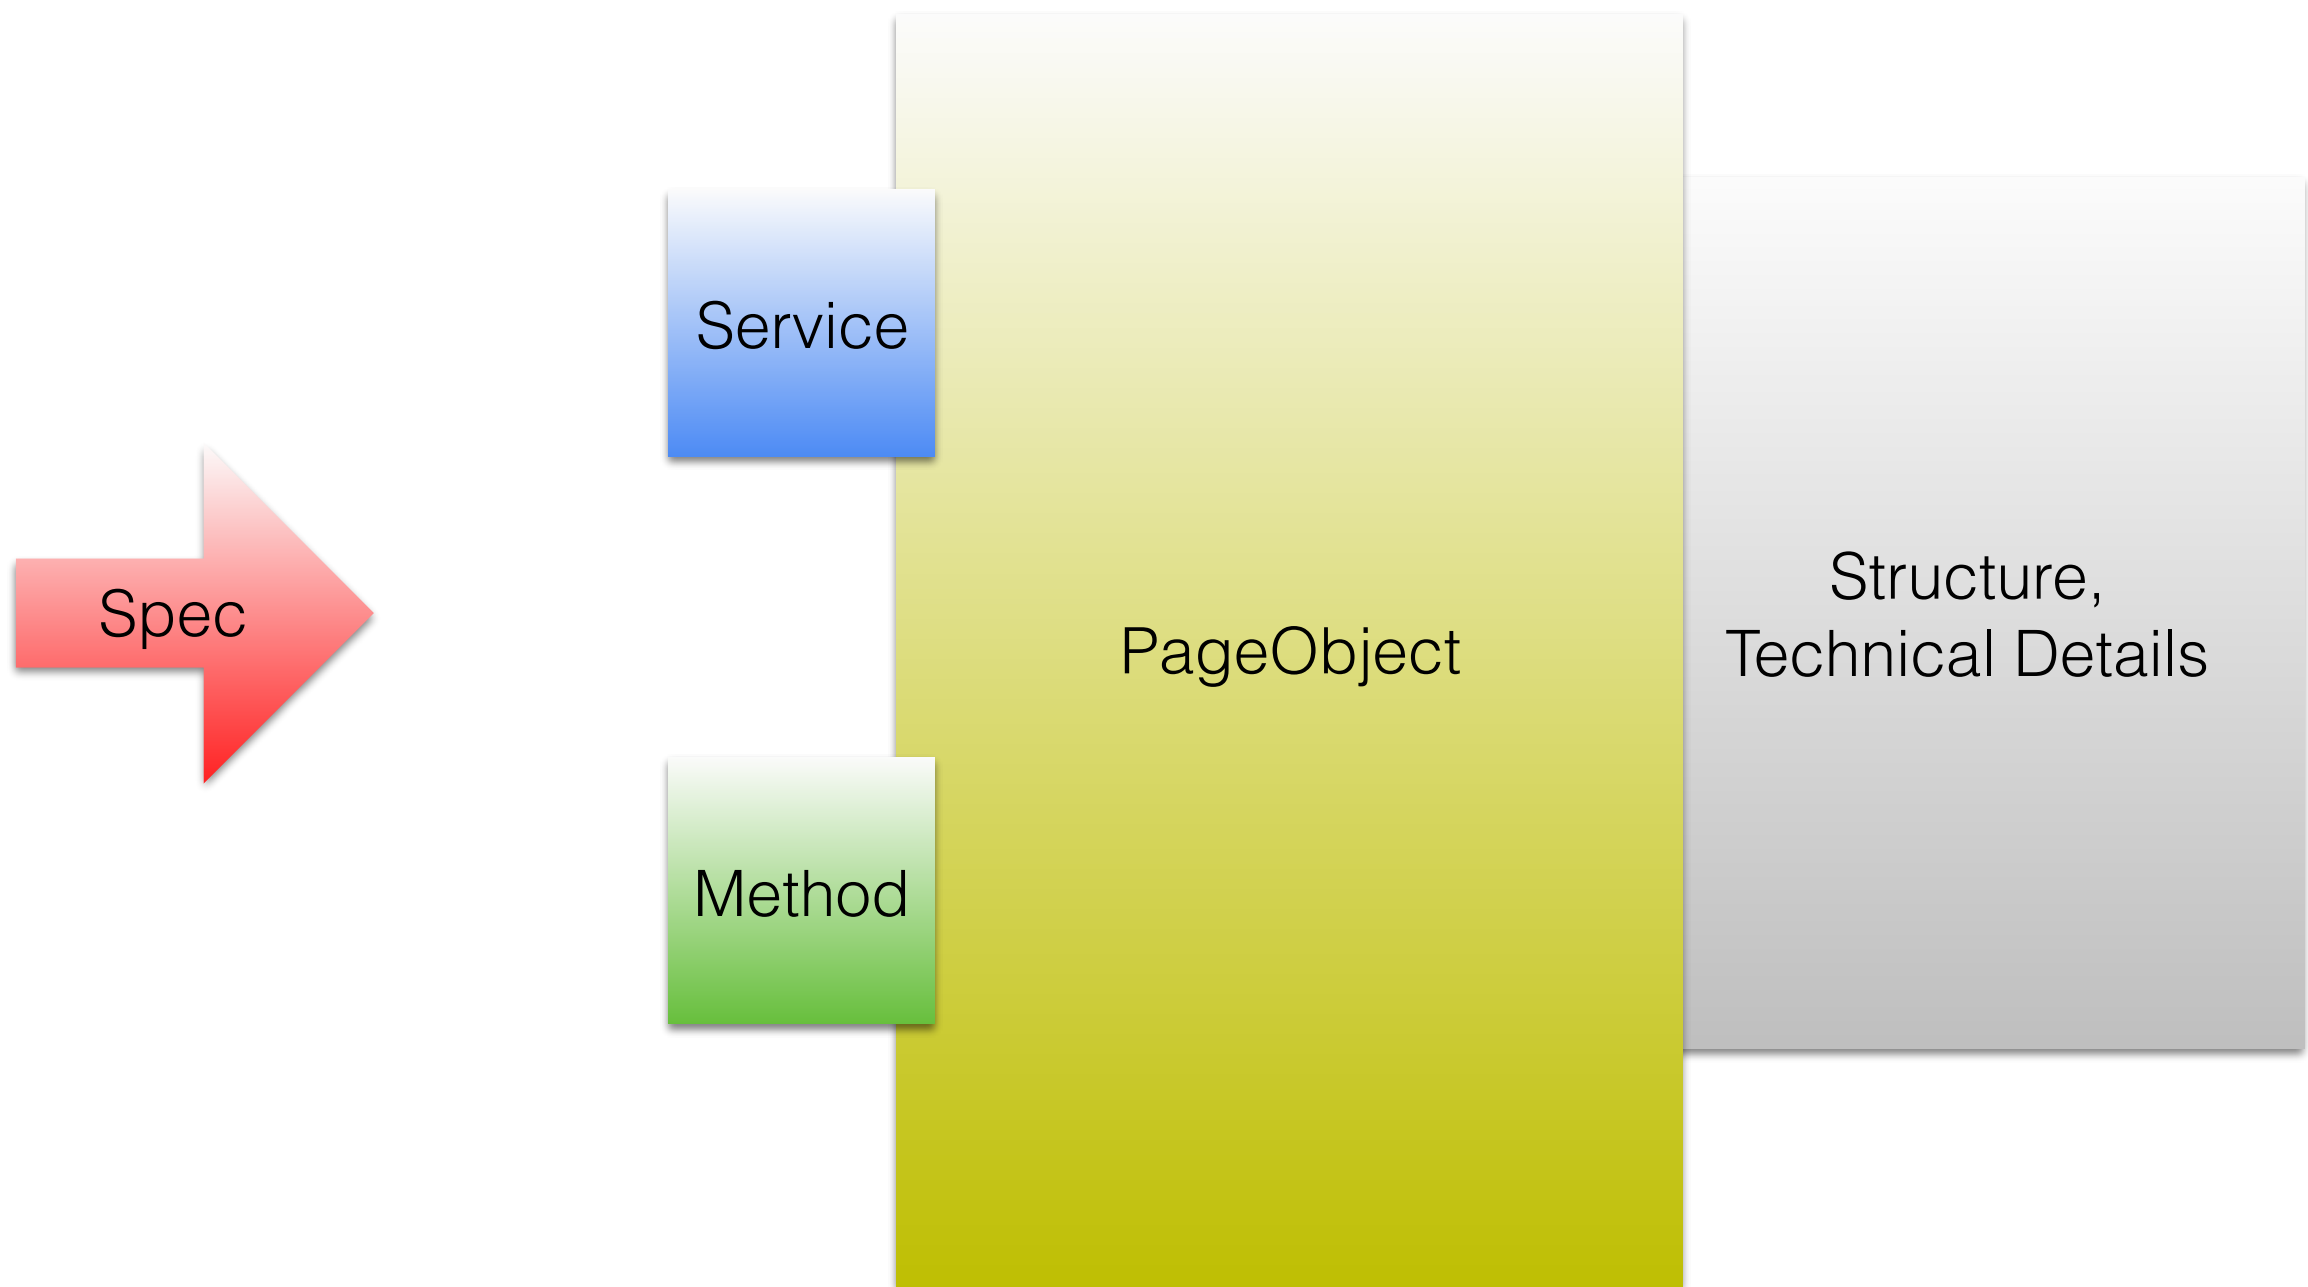

```
  waitFor { !$("div.modal").hasClass("fade-leave-active") }
```

```
}
```
